Power:1*8W

Important for your safety! Keep for future reference

1.These instructions are for your safety. Please read through them thoroughly prior to installation.

2.All fittings must be installed by a competent person according to local regulations.

3.Wiring diagrams are for references. Always shut off the electrical power before any operations.

Always refer to the terminal markings and ensure all electrical connections are tight and no loose strands are left out of the terminal block.

4.Always disconnect the product from mains at least 10 minutes allowing to cool down before any maintenance or adjustment.

5.Regular schedule of care to keep the surface condition well.
